

Relivereport August 12-2001

To: Chief Engineer Steinar Sjøhaug
From: Chief Engineer Bjarne Kleven

Welcome back Steinar.

Well, a lot has happened the last 10 weeks and you will find it in the daily report.

About people.

New vacation plans have been received from Hjartnes, these have been reviewed and adjusted. The El. Asst. is now on a 30/10 system, Hjartnes wanted them to have minimum 7 months onboard so their vacation schedule have been adjusted accordingly.

We have received 4 new engineboys and are expecting four more, these boys are planned to be used as cleaners etc. in ref. dep and plumbing dep and in the engine compartments. Stoker Liberato Esperida signed off on sick leave Aug 05.

One new repairman is arriving Aug 12. He is not on the list yet.

Sidre Kjersem is transferred to Norwegian Sun.

One new Elect has arrived from Star, Bjørn Kaale. He has been here before 89-90.

Mr. Kjelland is also onboard until further notice, you probably know him from N. Star.

Elevator Teck, Vannebo and Jerpeseth have some overlap coming up, this was meant to be done if we are going to change some of the elevators, if the ship is going to be sold this will not be necessary and their vacation plan can be adjusted. UP To you.

Arnfinn Stakston is acting as Ch. Ref Engineer at the moment, he is actually 2. nd Engineer trainee, he has been here before as ref engineer tr. He is assigned to this job until the new one from Star is arriving or until Rasmussen is returning from Vacation. No news from Star about the new ref. engineer. We also have a second ref. engineer, Mr. Almklov, he is still training but is taking it quickly so we should be able to use him as ch. ref later on. Some changes have been made on the 2. nd engineers, Knutsen is gone, Tore Hansen is gone to Majesty, Dan Evensen went to the Sky as Environmental, Fosbo is most likely going to a new ship, Bjørn Reithe is probably going to the star, Lasse Lihaug is on TBA. Bjørn Asbjørnrød is arriving the 12 of August and he has been here before.

Then we have Jarle Haugsdal, which also has been here before, he will be replacing Bjørn Reithe, he is going to the star.

I will try to update all the vacation plans before I leave.

Repairman Andrejz Gryzan has been asking for transfer to Majesty, I have told this to Hjartnes so he is fully aware of this.

Day to Day Operation.

In the Engine room, it has been the usual summer problems with high temperatures on the condensers and too little aircondition cooling, so far we have managed but we are always on the edge. We have cleaned the s/b condenser a couple of times, so there
